

CRYONOMIC® Dry Ice Repacker DIR-500

DIR-500 replaces the heavy job of manually filling!

"Since we have started using the machine it has saved us 60% on time and also there is no more manual lifting for the warehouse staff. The machine has been a great addition for our packaging process." (Ferring, 2018)

FEATURES DIR-500

- Hydraulic drive rotating device, manually operated
- Hydraulic lift and tilt movement
- Manually filling with a fixed speed
- Steel welded and paint coated frame
- Build-in scale with display
- Support for the scale
- Shielding doors equipped with safety contacts
- Delivered with manual and CE certificate

The DIR-500 is a device built to meet the need to repack bulk produced dry ice into smaller doses of dry ice/nuggets (up to 16 mm) for your target market.

OPTIONAL AUTOMATIC FILLING WITH VARIABLE WEIGHT PER PACKAGE

PLC control with touch screen
(pre-programmed keys for variable weight)

Filling with variable speed

Roller conveyoyor

Scale with detector to stop at
the pre-selected weight

GOOD TO KNOW

- While the machine is filling a box, the operator has the time to close and label the filled box!
- The DIR-500 is an additional machine to the CRYONOMIC® CIP-5L pelletiser and the CIC-500 dry ice container.

CRYONOMIC® has a worldwide network.
